Carbonable

WHO ARE WE?

~~Greenwashing~~
Provable Climate Contribution

While undeniably crucial for the fight against climate change, carbon contributions are undermined by archaic systems and a prevailing lack of faith in the market. At Carbonable, we're on a mission to engineer trust and operational efficiency to scale the carbon offset market through integrity.

Powered by blockchain technology, our groundbreaking Carbon Offset Platform enables companies to execute their climate contribution strategy in the most efficient way, while garanteeing auditability.

Standardize — PARAGUAY, Project by Investancia, Certified by Verra, 300m², 28 years — Chaco Agroforestry 0,2737 T / year

Monitor

Report — 2022, our most impactful year — We are delighted to report that we and our community have significantly contributed to 10 of the 17 Sustainable Development Goals, making a positive and lasting impact on sustainability.

WHY US?

Join an innovative and vibrant team that dares to dream big and act boldly!

🚀 **Innovation at its Core:** We're pioneering the Carbon Offset Market, with advanced technologies like Blockchain and AI. Here, you will be an explorer, driving innovations that matter.

🌱 **Purposeful Impact:** Your daily endeavors extend beyond business; they're a fight for combating climate change, preserving biodiversity, and uplifting local communities.

🌐 **Remote-First Flexibility:** With our growing, Europe-spanning team, enjoy the freedom to design your work life, embracing remote connections and worldly explorations. Your journey, your rules.

📚 **Continuous Learning:** Dive into an environment filled with new concepts at the intersection of sustainability and technology. Elevate your game with continuous learning opportunities.

💪 **Empowerment & Impact:** In our close-knit team, your contributions are shaping the company's trajectory. Your voice is heard, your ideas are valued, and your efforts make a difference.

JOB DESCRIPTION

We are opening a new Technical Project Manager internship position, starting asap.
Reporting to the Leadership team, your goal will be to support us in planning and managing the development of the Carbonable product and the delivery of customer projects
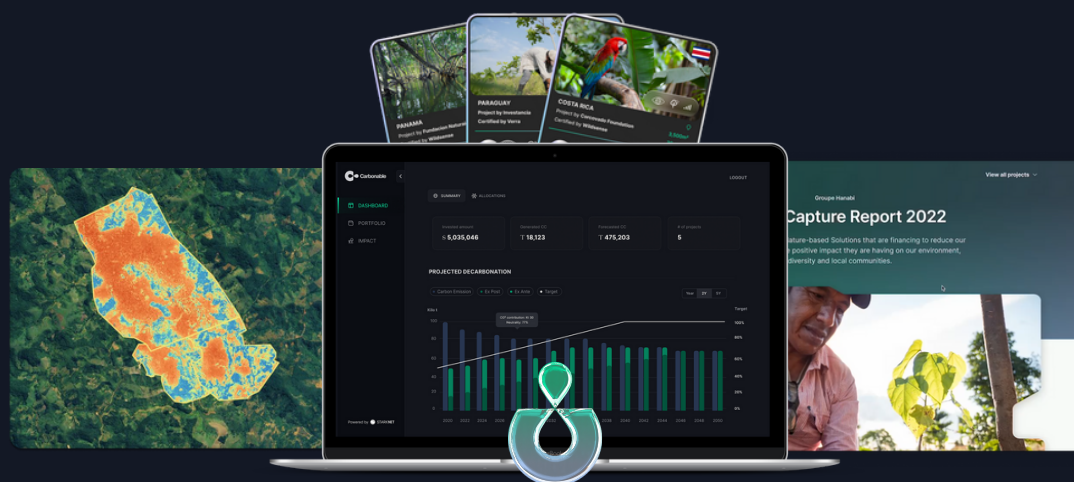

Your missions will be:
- Work with the scrum master in the agile product development cycle, with a product owner's hat
- Be the point of contact for customer projects
- Analyzing, planning, and developing scheduled projects
- Establishing and implementing training processes for all technical personnel
- Contribute to the analysis of Carbonable product functionality requirements
- Contribute to strengthening Carbonable's internal processes and product
- Participate in B2B calls when relevant

PROFILE

We are made to work together if you have/you are:

- Bachelor's or Master's degree holder in relevant field
- Cear understanding of the Project Management processes, strategies and methods
- Personal accountability when it comes to both decision-making and supervising teams
- Proactive, not afraid to make mistakes, to propose and test new ideas and iterate
- Strong analytical skills, and can think critically. You can structure problems logically, and then design and implement solutions that focus on the core issues
- Self-starter who aims to constantly learn, improve, and challenge yourself to stay at the top of your game
- Passionate about sustainability, technology, and innovation

If you're inspired by Carbonable's mission, and think you are the perfect fit - Jump in!
